APPENDIX 7
UC DAVIS
DIVING EMERGENCY MANAGEMENT PROCEDURES

Introduction
A diving accident victim could be any person who has been breathing compressed gas underwater regardless of depth. It is essential that emergency procedures are pre-planned and that medical treatment is initiated as soon as possible. It is the responsibility of each dive project lead diver or dive supervisor to develop procedures for diving emergencies including evacuation and medical treatment for each dive location.

General Procedures
Depending on, and according to, the nature of the diving accident, stabilize the patient, administer 100% oxygen, contact local Emergency Medical System (EMS) for transport to medical facility, contact diving accident coordinator as appropriate. Explain the circumstances of the dive incident to the evacuation teams, medics and physicians. Do not assume that they understand why 100% oxygen may be required for the diving accident victim or that recompression treatment may be necessary.

1. Make appropriate contact with victim, rescue as required.
2. Establish ABCs (Airway, Breathing, Circulation) as required.
3. Call local Emergency Medical System (911 in the most of US, VHF channel 16) for transport to nearest medical treatment facility.
4. Administer 100% oxygen, if appropriate (in suspected cases of decompression illness, barotrauma, shock, or near drowning).
5. Call UC Davis Occupational Health at (530) 797-6691 for advice and to coordinate possible hospital to chamber transportation. They will need to know: Destination of the ambulance, telephone number at the ambulance's destination, patient's signs and symptoms, first aid administered, patient's name, age, sex, usual physical condition, what happened and any contributing factors involved or suspected.
6. Contact DSO Jason Herum (work 707-875-2032, cell 707-774-5052) or his designee.
7. If the injured person is diving under UC Davis auspices, a report must also be made to UCD's Workman's Compensation carrier within 24 hours. Report to your Department Personnel Manager. At BML contact (707) 875-2011, Fax (707) 875-2009.
8. Complete and submit AAUS Incident Report Form (Appendix 8 of the Diving Safety Manual) to the UCD Diving Control Board (As required in Section 2.72).

List additional emergency contact numbers appropriate for dive location:
(See Appendix 7A and 7B for local emergency contact information)

Divers Alert Network (DAN) 24 hour EMERGENCIES (919) 684-9111
DAN non-emergency medical information (919) 684-2948 or 1-800-446-2671

Report any diving-related accident and/or injury to the DSO and Dr. Paisley immediately

Dive teams must have an oxygen unit and first aid kit available.

Oxygen units and a small first aid kit are stored in Room 200, the Dive Locker.
Research vessels must have a VHF radio, or some other form of communication with shore, and all other
USCG, State & UC required safety equipment on board when underway.
