CMSI is pleased to announce the ten recipients of the UC Davis Bilinski Fellowship. Meet the fellows here.

On October 26th, more than 180 people from around the world gathered to celebrate the life of Dr. Susan Williams. A memorial fund has been established in her honor. Donate to this fund.

UC Davis is featured predominantly in the California Ocean Acidification and Hypoxia Task Force. Learn more what we’re up to here.

Marissa Baskett, a UC Davis researcher, co-authored a new interim report with the National Academy of Sciences, Engineering, and Medicine exploring the science of interventions to save coral reefs. Read the report here.

Follow along our blog series hosted by the Bodega Science Communication Collective:

In a National Geographic series, "Weird Animals of the Week," UC Davis Professor Jay Stachowicz shares why some crabs spend the energy to hold a sponge over their heads. Find out why here.

Gregory Urquiaga/UC Davis

Is there a silver lining for the shellfish industry? Research conducted by UC Davis Professor Eric Sanford reveals that red abalone may be better equipped to handle ocean acidification resulting from climate change. Find out why.
Empathy as a Universal Language by A. Smart

Encountering the Marine Debris Crisis in Indonesia by K. DuBois

Where Have All the Bull Kelp Gone? by J. Hollarsmith

The Hunt for Bryozoans by I. Neylan

Jobs

The Hopkins Marine Station at Stanford is looking for a postdoctoral researcher in population dynamics and fishery management. Email to apply.

Spotlight

Meet Lorenzo Ray Olano, an undergraduate in the Todgham Lab!

In the early summer months, UC Davis undergraduate Emily Meyers would rise before the sun, sometimes around 3 or 4 a.m. This past summer, Emily completed research for her senior thesis at the Bodega Marine Laboratory. Here's her story.

The late UC Davis Professor Susan Williams has found a way to help coral reefs fighting climate change. Using spiderlike frame, Indonesian coral reefs, cover increased six fold! Learn more here.

Cynthia Catton, an environmental scientist with the California Department of Fish & Wildlife at the Bodega Marine Laboratory was featured in a NY Times article, "California’s Underwater Forests Are Being Eaten by the ‘Cockroaches of the Ocean.’" Read the story!
Do you have any news, events, announcements and/or opportunities you want us to feature on the CMSI or BML websites or in the next issue of Tideline? Email us at cmsinews@ucdavis.edu.

Events

Join us on January 31st from 10am to 4pm for a Professional Development Workshop, "Academic Job Search in Marine Science." Register today.
